

TITLE

PEPTIDASE-CLEAVABLE, TARGETED ANTINEOPLASTIC DRUGS AND THEIR THERAPEUTIC USE

5

ABSTRACT OF THE DISCLOSURE

This invention is directed to antineoplastic agents conjugated to enzyme-
cleavable peptides comprising the amino acid recognition sequence of a membrane-
bound and/or cell-secreted peptidase, and to the use of such conjugated compounds as
10 chemotherapeutic agents in the targeted treatment of cancers.

“We were soon to see that men were more numerous than we had ever seen them before, and that they were well armed with bows and arrows.
